

OUTDOOR LEISURE COLLECTION

Jagram
LEISURE

HAVE YOU EVER WONDERED HOW CURVED GLULAM TIMBERS ARE MADE?

High-quality timber is cut into thin laths by means of precision saws. To form the desired shape of curves, we use high-frequency hydraulic presses. Planing and drilling is executed using axis CNC shaper and digital centres.

Modern machinery, patented technological solutions and the use of high-quality raw materials enable us to produce structural arches with a span of up to 26 m. All our products are characterized by high strength and quality in accordance with the EN 14080 - GL 24C standard. Premium grade raw material (FSC[®], PEFC[®]) is selected for the manufacture of our glulam curves. Our suppliers are exclusively certified world leaders.

Treatment of the timber used to produce Leisure range lends the products an amber hue and ensures resistance to rot for at least 10 years*.

* this applies to all products not coming into contact with the ground.
All sizes shown in the catalogue are approximate.

UNIQUE DESIGN

To create our Outdoor Leisure Collection we invited the best designers and timber engineers to focus on practicality as well as the visual effect. As a result it combines luxury and comfort to enhance any standard décor, lending it an exclusive, unique appearance.

EVEN ADULTS HAVE LOTS OF FUN SWINGING

054570

WAVE

At first glance the Wave wooden lounge looks as if it only serves as a decorative work of art. But it is in fact an extremely comfortable piece of furniture on which to unwind during an afternoon of relaxation. It features specially designed mattress.

M/L

HAMMOCK CHAIR

Hand-crafted colourful suspended chairs from South America. Made of 100% cotton. Lightweight and very comfortable. It can be hung on Optimist stand.

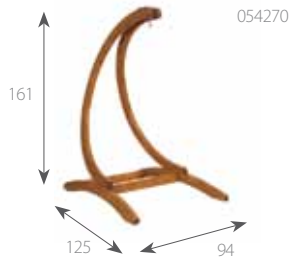

OPTIMIST

Optimist is a versatile structure from which can be suspended many of our products intended for rocking, such as our **Gaya Rocking Chair**, the **Wave Suspended Lounger** or our **canvas Cotton Hammock Chair**. The maximum permissible load is 120 kg.

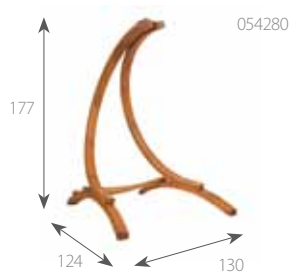

GENOA

Genoa is compact in design, so can be used even on a narrow balcony or in a small room. It can be used to suspend our products such as the **M (Medium)** and **L (Large)** versions of the **Gaya Rocking Chair**. The maximum permissible load is 120 kg.

SPINNAKER

Spinnaker is a sturdy and very durable piece of furniture with its enlarged sections of bent and glued arches making for a very flexible yet durable structure. We recommend using it with the **Gaya L (Large) Rocking Chair**. The maximum permissible load is 150 kg.

WOODEN STANDS

WOODEN LOUNGERS
